CURL YOUR BEST

Asham's Rotator Disk System (RDS™)

The RDS™ is unique in that our soles are designed specifically for curling to solve the challenges faced when using a typical curling shoe, specifically drifting, poor slider performance, reduced balance and stability.

Asham's patented RDS™ is just one of the many innovations in our endless pursuit of the perfect sliding platform. This sole is based on more than 10 years of R & D that includes testing by some of the world's best curlers. And we didn't stop there, we have significantly reduced the weight of the sole making it the lightest sole, available on the market.

The RDS™ is a sole that allows the disks to attach by Velcro®, providing the wearer the opportunity to upgrade, replace and customize your sliding platform quickly and easily. No more sending shoes in to have the slider or gripper replaced when worn or when you are ready to upgrade to a quicker slider. Simply order new disks and pop them on your shoe and you are ready to hit the ice again. If you are drifting during delivery, simply remove your disk and rotate it until you find the straightest sliding path.

This RDS™ has stood the test of time and is still the best sliding platform available on the market. All four 2019-2020 Canadian National Champions (men's, women's, junior men's, junior women's) wear the RDS™, both junior teams went on to become the 2020 World Junior Curling Champions.

Eliminates Drifting & Increases the Life of Your Sliders

- The sole of a shoe is longer than it is wide so the natural tendency of the foot when sliding is to go in the direction it is pointed. Circles have equal force on all areas and only travel in the direction they are "pushed," completely eliminating drifting from the delivery. It will now be easy to slide on the path.
- The grain in some sliding material, as well as worn, warped and scratched sliders, cause drifting. With the RDS™, simply remove the slider, "rotate" it and put it back on the shoe until you find the straightest sliding path. This extends the life of your sliders.

Enhances Balance and Stability

- Unlike most athletic soles that are curved from side-to-side and back-to-front, the RDS™ sliding disks lay perfectly flat, providing unmatched stability and performance.
- The disks extend beyond the width of a normal sole, further enhancing balance and stability.

Maximum Slider Performance

- A variety of leading sliding materials are available and the removable disks can be changed "on-the-fly," enabling curlers to perfectly match the sliding surface every time.
- Old, worn and damaged sliders are quickly replaced – that can't be done with glues!

The RDS™ is featured on a full line of Asham shoes

We have the right shoe for you!

Express Ultra Lite

The Express Ultra Lite will transform your game. This premium leather and urethane upper with our Ultra Lite RDS™ technology offers the perfect blend of cushioning and stability. The natural fiber is breathable and conforms to your feet for superior fit. The moisture-wicking lining will keep your feet dry and warm. The built-in lace cover keeps the laces off the ice reducing drag during delivery. Gripper disks and slip-on gripper included. Sliding disks sold separately.

14000 (Men's)

14100 (Women's)

Men's - Full and Half sizes 7-12, 13, 14

Women's - Full and Half sizes 5-10

Slam Ultra Lite

The Slam Ultra Lite curling shoe is functionally one of the best curling shoes on the market. It features an all leather upper on our Ultra Lite RDS™, with a leather lining, and extra insole, leather lace cover and a seamless toe to reduce drag. The Slam Ultra Lite comes equipped with two gripper disks and a slip-on gripper. Choose from a wide variety of sliding disks to customize your sliding platform.

120100 (Men's)

121100 (Women's)

Men's - Full and Half sizes 7-12, 13, 14

Women's - Full and Half sizes 5-11

Shoe care tip: Refrain from moving rocks with the side of your shoe. The side of the rock is sharp and will cause premature wear on your shoe which is not covered under warranty.

Competitor Ultra Lite

Get all the functionality of a top of the line curling shoe at an affordable price. The Competitor Ultra Lite curling shoe features the Ultra Lite RDS™, a built-in lace cover, durable synthetic upper and a seamless tow to reduce drag. This shoe comes ready to step on the ice with two 3/32" Teflon® sliding disks, two gripper disks, a slip-on gripper and lace cover. The 3/32" Teflon® sliding disks are ranked a 7 out of 10 on our slider speed rating. You can upgrade your disks to any of our sliding materials.

Men's - Full and Half sizes 7-12, 13, 14

Women's - Full and Half sizes 5-11

CURLING SHOE CUSTOMIZATION

ASHAM CAN CUSTOMIZE ANY SHOE!

Did you know Asham is the industry leader in curling shoe customizations? We used to make all our curling shoes right from scratch in our factory. We still have a fully functioning factory and still make all our own sliding disks, slip-on sliders and slider applications in our factory in Winnipeg. When it comes to curling shoes, we can do anything! We can make any shoe with any combination of our sliding materials. Below are just some of the customizations you can add to your shoe.

Toe Dip

The Toe Dip is a plastic coating applied to the trailing foot to reduce drag. Depending on how your trailing foot contacts the ice you may find the toe dip improves the feel and speed of your delivery. Our toe dip material is flexible and will not make the trailing foot hard, which can contribute to drifting. Stiff toe dip is available by request. Toe dip is not easy to remove once dipped.

Toe Wedge

The Toe Wedge is a piece of Teflon® that is applied to the toe of the RDS™ for extreme toe or tuck sliders. Not all toe or tuck sliders will require the Toe Wedge.

Hinge

The Hinge is a split in the slider at about the halfway point of the slider to allow for bend. The hinge is good for tuck or toe sliders using 1/4" Teflon®.

THE RIGHT FIT FOR YOU

It is very important that your shoes fit properly. Ensure your foot has enough room in the toe box. There should be about half an inch between your toes and the end of the shoe. The shoe should be wide enough in the toe that your toes can move freely. Your heel should not slip, and the shoe should not pinch or bind, especially across the arch or ball of your foot. When shoe shopping, be sure to wear the same socks you curl in. This can make a huge difference in how a shoe fit. Try on both shoes, your feet may not be the same size. Feel free to contact us; we will help you find the Asham shoe that is the right fit for you!

SLIDERS & GRIPPERS

Create the perfect sliding platform with any combination of our sliding materials! We can customize any shoe for you!

Apollo Slider & Gripper Options

9241200 1-1/8"

Weight (handle only)

1" 219g

1-1/8" 269g

Ultra Lite Taper V2

The lightest handle available on the market! Sweep using the latest in Ultra Lite Carbon Fiber technology, made from table-rolled 3K and UD high modulus carbon fiber which cuts weight without compromising strength and durability. The tapered external wall decreases weight. The grip handle provides a textured end closest to the head for maximum grip.

Available in NON-Grip and Grip models (colors vary)

9241180 GRIP

9241181 NON-GRIP

Weight (handle only)

1-1/8" 155g

Taper Non Grip 171g

Taper Grip 160g

All handles available on their own without heads

OV2 Pad

Worn and dirty pads should be replaced. The OV2 pad is a great option for the recreational or beginner curler.

Available in Uni-Fit or Velcro® models. The Uni-Fit model fits most standard heads and attaches by two screws. The Velcro® model attaches to the head by way of Velcro® and fits the Asham V2 Head.

9469 Uni-Fit

9465 Velcro®

GV2 Pad

The evolution of our grooved pad. The GV2 is designed to be water resistant and provide greater sweeping efficiency through reduced resistance while polishing pebble. The Uni-Fit model fits most standard heads and attaches by two screws. The Velcro® model attaches to the head by way of Velcro® and fits the Asham V2 Head.

9468 Uni-Fit

9467 Velcro®

Pro Pad - WCF Approved

This WCF approved pad with molded closed cell foam is made with WCF approved material. Comes in Uni-Fit and Velcro® models. Uni-Fit fits most standard oval heads, Velcro® fits the V2 head.

93601 Uni-Fit

9360 Velcro®

V2 Head

Replace loose or worn broom heads with the V2 Head.

The V2 Head fits most standard handles, attaches by two screws and can fit most of the standard pads on the market.

The new lighter weight V2 head is made of high impact ABS for maximum strength to weight characteristics. A great broom head for curlers of all levels.

Comes as a multi-use head and can attach pads by way of Velcro® or Uni-Fit (screws) to fit most standard oval pads.

940

Adjustable Attachment

This attachment can be adjusted to be stationary or either angle. Fit most standard handles and attaches with two screws.

Ultra Force Broom

The Ultra Force Brush maximizes sweeping effectiveness and efficiency. The Ultra Force head is molded with polypropylene. The mold design is reinforced so rigidity of the head occurs when pressure is applied. The firm head places equal pressure on all areas of the pad. The pivot on the head is made of high-grade steel with a machine threaded screw. The steel connecting rod is molded into the head and runs from the front edge to the back edge. This direction gives the sweeper more advantage in applying equal force to the forward and back brush stroke. The pad attaches to the head by Velcro® making for quick replacement. The head measures 20.3 cm long and 8.2 cm wide. This size allows sweepers to brush close to the rock. The head is light weight at only 156 grams. The pad is made of Cordura fabric, Velcro® and foam. The Cordura nylon is long wearing and will give you efficient sweeping for lots of games. The foam is firm in density. The stiffness allows the curler to polish the top of the pebble. The foam is low profile and water resistant. If you are a competition curler, we have an approved World Curling Federation pad to fit your needs.

Wood Delivery Head

The wooden head slides easily and is smooth on the ice during delivery.

Attaches to any handle that has screws to attach the head to the handle.

Comes with pad.
